

Job Circular

Company Name: Brain Station 23 PLC

Position: Junior Full Stack Web Developer

Job Type: Full-Time

Workplace: On-site

Job Location: Dhaka, Bangladesh

Application Deadline: 31 July 2026

Job Summary

Brain Station 23 PLC is seeking a passionate and motivated Junior Full Stack Web Developer to join its Software Engineering team. The ideal candidate should have strong knowledge of modern web technologies and be eager to build secure, scalable, and responsive web applications. Fresh graduates with excellent academic projects and a strong willingness to learn are encouraged to apply.

Educational Requirements

- Bachelor of Science (B.Sc.) in Computer Science & Engineering (CSE), Software Engineering, Information Technology, or a related discipline.
- Fresh graduates are encouraged to apply.

Skills & Requirements

Frontend

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- Bootstrap
- Tailwind CSS
- Responsive Web Design

Backend

- Node.js
- Express.js
- REST API Development
- JWT Authentication
- Firebase Authentication

Database

- MongoDB
- MySQL

Development Tools

- Git
- GitHub
- Visual Studio Code
- Postman

Additional Skills

- Strong understanding of Object-Oriented Programming (OOP)
 - Knowledge of Data Structures and Algorithms
 - Understanding of Software Development Life Cycle (SDLC)
 - Familiarity with Agile/Scrum methodology
 - Strong problem-solving and analytical skills
 - Excellent communication and teamwork abilities
 - Ability to learn new technologies quickly
-

Job Responsibilities

- Develop and maintain modern, scalable web applications.
 - Build responsive user interfaces using React.js.
 - Develop RESTful APIs using Node.js and Express.js.
 - Design and manage MongoDB and MySQL databases.
 - Implement secure authentication using JWT and Firebase.
 - Collaborate with UI/UX designers, QA engineers, and software developers.
 - Debug, test, and optimize application performance.
 - Write clean, reusable, and maintainable code.
 - Participate in code reviews and Agile development processes.
 - Maintain project documentation and version control using Git and GitHub.
-

Preferred Qualifications

- Experience with MERN Stack projects.
 - Personal or academic projects available on GitHub.
 - Portfolio website demonstrating web development projects.
 - Knowledge of deployment platforms such as Vercel or Netlify.
 - Passion for continuous learning and software development.
-

Employment Benefits

- Competitive Salary
 - Performance-Based Salary Review
 - Two Festival Bonuses
 - Provident Fund
 - Medical Coverage
 - Weekly Two Holidays
 - Professional Training Opportunities
 - Friendly and Collaborative Working Environment
 - Career Growth Opportunities
 - Opportunity to Work on International Software Projects
-

Application Procedure

Interested candidates are requested to submit:

- Updated Resume (CV)
- Cover Letter
- GitHub Profile
- Portfolio Website (if available)

Company: Brain Station 23 PLC

Location: Mohakhali C/A, Dhaka-1212, Bangladesh

COVER LETTER WORKSHEET

Preparation

1. To whom are you sending the letter?

Name (if any): Hiring Manager

Title: HR Department

Company, Address:

Brain Station 23 PLC

8th Floor, 2 Bir Uttam A.K. Khandaker Road, Mohakhali C/A, Dhaka-1212, Bangladesh

2. Based on the job announcement keywords and what you know about the job, what is the company looking for in a candidate?

- Strong knowledge of HTML5, CSS3, JavaScript (ES6+), and responsive web development.
- Experience with React.js, Node.js, Express.js, MongoDB, and REST API development.
- Familiarity with Git, GitHub, authentication systems (JWT/Firebase), and modern software development practices.
- Strong problem-solving ability, teamwork, and effective communication skills.

Opening Paragraph

1. What is the exact title of the job?

Full Stack Web Developer

2. How did you discover the job was available?

Job Board (Bdjobs.com)

Cite the URL:

<https://jobs.bdjobs.com/jobdetails.asp?id=1389865>

3. When was it published?

July 2026

4. Why are you interested in this particular job and company?

I am passionate about developing modern, scalable, and user-friendly web applications. Brain Station 23 is recognized as one of Bangladesh's leading software companies, offering an innovative work environment, exposure to modern technologies, and excellent opportunities for professional growth. I am eager to contribute my technical skills while learning from experienced professionals.

Middle Paragraph

1. What do you have that matches those needs?

- Strong academic background in Computer Science and Engineering with practical knowledge of software development.
- Hands-on experience in building responsive web applications using the MERN Stack (MongoDB, Express.js, React.js, and Node.js).
- Experience with REST API development, database management, authentication systems, Git, and GitHub through academic and personal projects.
- Good analytical thinking, problem-solving ability, and teamwork skills.

2. Determine the two or three areas that are the highest priority to the company.

- Developing scalable Full Stack web applications using the MERN Stack.
 - Designing secure RESTful APIs and database-driven applications.
 - Building responsive, high-performance user interfaces while following modern software development practices.
-

Closing Paragraph

1. What is the person expecting you to send?

- A professional CV
 - Cover Letter
 - GitHub Portfolio
 - Portfolio Website
-

2. What do you want to happen after you send the resume?

I hope to receive an invitation for an interview where I can demonstrate my technical knowledge, discuss my projects, and explain how I can contribute as a Full Stack Web Developer.

Awal Centre, 34 Kemal Ataturk Avenue, Banani, Dhaka-1213
Bangladesh

Subject: Application for the position of Full Stack Web Developer

Dear Sir/Madam,

I am writing to express my interest in the Full Stack Web Developer position at Brain Station 23 PLC. As a final-year Computer Science and Engineering student at American International University-Bangladesh with hands-on experience in the MERN stack, I am confident that my technical background and project experience make me a strong fit for your development team.

Over the course of my degree, I have built and deployed several full stack applications using React.js, Node.js, Express.js, and MongoDB, along with RESTful APIs secured through JWT and Firebase Authentication. These projects, ranging from an e-commerce platform to a student management system, gave me practical exposure to the same technologies your team relies on, including responsive front-end design, backend architecture, and database management. I have also worked with Git and GitHub throughout, which has made collaborative development and version control second nature to me.

Brain Station 23's reputation for delivering enterprise-grade fintech, e-commerce, and healthcare platforms to clients across the globe is exactly the kind of environment I want to grow in. I am particularly drawn to the opportunity to work alongside experienced engineers on production systems that serve real users at scale, while continuing to sharpen my skills in scalable application design and clean coding practices.

I would welcome the opportunity to discuss how my academic projects, technical skill set, and enthusiasm for full stack development can contribute to your team. Thank you for considering my application. I have attached my resume for your review and look forward to the possibility of speaking with you further.

Sincerely,

Md Javed Iqbal Naquib

B.Sc. in Computer Science and Engineering, AIUB

MD JABED IQBAL NAQUIB

Full Stack Web Developer | Fresh Graduate, B.Sc. in CSE (AIUB)

Dhaka, Bangladesh | +8801881418553 | naquibjabed@gmail.com

CAREER OBJECTIVE

To secure a position as a Full Stack Web Developer where I can apply my knowledge of the MERN stack, REST API development, and responsive web design to build scalable, user-focused applications, while continuously learning modern JavaScript technologies and contributing effectively within a collaborative engineering team.

PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student at AIUB with practical experience in full stack web development, including front-end interfaces built with React.js and Tailwind CSS, and back-end services built with Node.js, Express.js, and MongoDB. Comfortable working across the stack, from database design and authentication to REST API integration and deployment, with a strong focus on writing clean, maintainable code.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, JavaScript (ES6+), SQL

Frontend Development: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, Responsive Web Design

Backend Development: Node.js, Express.js, REST API Development, JWT Authentication, Firebase Authentication

Database: MongoDB, MySQL

Version Control: Git, GitHub

Tools: Visual Studio Code, Postman, Firebase, Vercel, Netlify

EDUCATION

Bachelor of Science in Computer Science and Engineering (CSE)

American International University-Bangladesh (AIUB) | Expected 2028

ACADEMIC PROJECTS

Personal Portfolio Website — *React.js, Tailwind CSS, Framer Motion*

- Designed and developed a responsive personal portfolio using a dark glassmorphism aesthetic to showcase projects and skills.
- Implemented smooth scroll navigation, reusable components, and mobile-first layouts.

E-Commerce Website (MERN Stack) — *React.js, Node.js, Express.js, MongoDB*

- Built a full stack e-commerce platform with product catalog, cart, and order management.
- Implemented secure user authentication with JWT and role-based access for customers and admins.
- Designed REST APIs for product, cart, and order operations with MongoDB as the data store.

Student Management System — *React.js, Node.js, Express.js, MySQL*

- Developed a CRUD-based system to manage student records, courses, and attendance.
- Structured a relational database schema in MySQL and connected it to a Node.js/Express.js backend.

Authentication System — *Node.js, Express.js, JWT, Firebase Authentication*

- Built a standalone authentication module supporting email/password and Firebase-based login.
- Implemented token-based session handling and protected API routes using JWT middleware.

REST API Projects — *Node.js, Express.js, MongoDB, Postman*

- Designed and documented multiple REST APIs following consistent endpoint and status-code conventions.
- Tested and validated endpoints using Postman before integrating with front-end applications.

PRACTICAL EXPERIENCE

Through academic and self-directed projects, I have gained practical, end-to-end experience across the full stack development lifecycle:

- Developed multiple full stack MERN applications independently, from database schema to deployed front end.
- Designed and integrated REST APIs, handling both server-side logic and client-side consumption.
- Implemented authentication and authorization flows using JWT and Firebase Authentication.
- Designed relational and non-relational database structures using MySQL and MongoDB.
- Built fully responsive interfaces tested across mobile, tablet, and desktop breakpoints.
- Collaborated with classmates on team-based coursework projects using Git and GitHub for version control.
- Applied structured problem-solving and debugging practices while working under project deadlines.

ACHIEVEMENTS

- **Winner, Web Development Contest** — American International University-Bangladesh (AIUB) (2024)
- **Runner-up, Programming Contest** — American International University-Bangladesh (AIUB) (2024)
- **Participant, Inter-University Hackathon** — American International University-Bangladesh (AIUB) (2025)

STRENGTHS

Problem Solving • Analytical Thinking • Team Collaboration • Communication • Quick Learning • Adaptability • Clean Code Practices • Time Management • Critical Thinking • Attention to Detail

CO-CURRICULAR ACTIVITIES

- Member, AIUB Computer Club — participates in club-organized coding events and knowledge-sharing sessions.
- Participant, university and inter-university programming contests and hackathons.
- Attendee, web development workshops covering React.js and Node.js fundamentals.
- Regular participant in online coding challenges to strengthen algorithmic problem-solving.
- Self-directed learner of open-source projects on GitHub to study real-world code structure.
- Attendee, technical seminars on modern JavaScript frameworks and software engineering practices.
